RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Cathy Seidell

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Pete Rorvik

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Already there is not enough competition in the telecommunications marketplace. The takeover of ATT would be one more nail in the coffin for consumers. T-Mobile offers a real alternative to ATT & Verizon. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is a perfect example of what our anti-trust laws are supposed to prevent. If approved, AT&T and Verizon will control 80% of the marketplace and that is BAD news for consumers! AT&T's proposed takeover of T-Mobile runs directly counter to this mandate to "foster innovation and offer consumers reliable, meaningful choice in affordable services". The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Didn't we break up Bell in the 1980s because it was too big? Why are we letting the pieces recombine? Didn't we just, in the last few years, determine that the ill actions of large ("too big to fail") companies can have huge negative impacts on US citizens, our nation, and the world? The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. AT&T has a history of censoring content and blocking phone features it doesn't like. Maybe it's ok if it does that if phone customers have a choice between a company that censors and a company that doesn't, but when phone service is suddenly once again available only through one (or two) big companies, this behavior becomes a huge problem.

Sincerely,

K. A.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

There is no reason to believe that the AT&T takeover of T-Mobile will benefit consumers. The "consumer" is also a voter, the basis for government. Pleased do not operate against the best interests of the governed.

Sincerely,

Barry Schoenborn

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Laurel Beyrer

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Att does not do a great job with its current customers now, when it has competition. What would (or wouldn't) they do if they are allowed to take over T-Mobile? Please do not let this deal go through. It will hurt the customers, who now at least have a choice of carrier. If we cannot vote with our feet, we have no clout at all. When ATT was forced to split up, was that good for competition? How is it that we don't need competition now? The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. To the Federal Communications Commission,

As a T-Mobile customer a) I don't want to pay money to a company that sold out its customers privacy during the Bush years, b) Will degrade my current service with millions of iPhone users, c) Probably lower T-Mobile's customer service standards, d) Probably raise the rates I currently pay and e) obtain a monopolistic stranglehold on GSM service. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

David Reid

AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

William Kauffman

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Charles Glaser

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Carla Hervert

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Bill Brown

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I am totally opposed to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. You have set out your role as a defender of competition, stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. In fact you always seem to side with Big Telecom. Why is that? The proposed takeover would cut competition inevitably leading to higher prices and less choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. Follow your mandate: protect competition in mobile phone services and block this takeover.

Sincerely,

Charles Orth-Pallavicini

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Daniel A. Christ

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). When we see that such a merger would be in violation of American anti-trust laws, why would we wait until after the fact to act? It is easier to prevent anti-trust than to challenge it through the courts and dismantle it. And the damage would have already been done. AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition, stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Debra Temple

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Noller

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

James Goldberg

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Karolis Zukauskas

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should absolutely not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. The FCC is supposed to protect the citizens of this country from being manipulated and controlled by the multi-billion dollar corporations who will do anything in their own best interests—at the expense of the citizens and the democracy in this country. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. I hope the members of the FCC will take into account the welfare of the citizens of this country instead of the multi-national companies—who, by the way, send most of their jobs overseas instead of hiring people in the United States. Again, I urge the FCC to block this takeover!

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Elaine Leach

To the Federal Communications Commission,

For God's sake don't set up consumers to be taken advantage of by a corporate monolith of a merged AT&T and T-Mobile. You are supposed to be protecting the interests of Americans. Not just the billionaires and millionaires, but the mass of us to whom bills are a real concern and hardship. Stand for working Americans, not corporate profiteers. The big guys have far, far more than their share. They do not need more. We need protection.

AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

John Evans

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Lonnie Foster

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Thomas Bankston

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. The bottom line is that consumers need more choice, not less choice. We don't need higher prices and more limits to our freedom of speech. More competition is needed, not less. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Marsha Goodman-Wood

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

AT&T has one of the worst records for customer satisfaction. And there's no other reason than they just don't care. And now they want to become an even bigger bad company. And on top of that they move more into a monopolistic position with them and Verizon controlling 80% of the market. Then those to merging is just a backroom deal away. It's a very, very bad idea.

Sincerely,

Gary Toth

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Harry Farr

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Irma Kay

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. Additionally, I have gotten rid of my landline with AT&T because of their relentless phone solicitations (I switched to Vonage) of 3-5 calls EVERY week urging me to buy this or that. I currently have T-Mobile for my cell phone and am horrified that a merger would open the door to AT&T to "persecute" me again with pestering solicitations since I would have a business relationship with them again. Please stop this insanity! If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Michael Bowen

Hasn't corporate America already gained enough control over the choices and lives of America's? Some of it is good, I grant that but much of it is unwarranted intrusion into our lives. Communications is one arena where competition should be preserved and in fact, encouraged. Communications services are vital to the lives of every American. Competition serves to keep the technology advancing and affordable for a service that is a basic part of our lives. Communication services are not a luxury, they are a necessity. Stay true to the FCC charter and do not allow this takeover to damage the lives of the American citizen. Thank you.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

J W Mueller

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Judy Dotson

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Joy Parker

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Julie Kirby

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). That takes us back almost 30 years and returns the company that hadn't innovated beyond desk top phones and didn't offer much more than simple dial-it-yourself long distance.

Sincerely,

June Blacksten

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Kaz Bernacki

The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Kit Jones

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Karen Schwartzman

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. AT&T has a history of censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Somdev Bhattacharji

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Luis Cavallone

The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Stop AT&T! I was not pleased with the calling plans they offered when I was their mobile customer and I actually got them to treat me better when I told them I was switching to T-mobile. I was actually on the phone to cancel with AT&T when they finally began to negotiate. Taking their competition off the market will make it very hard on consumers who rely on their mobile service to go about their day to day lives. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

As a T-Mobile customer, I write to ask that the FCC not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. As a T-Mobile customer, and as a patriotic American, I am 100% certain that I do not want to be an AT&T customer. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

David Mitchell

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). The reasons why we have anti trust laws are because large companies stifle innovation, provide poor service and eliminate the need to control costs. If AT&T is allowed to take over T-Mobile, the mobile phone market will be effectively controlled by two large companies, hardly a healthy situation. Block this proposed merger as your own policies dictate. Thank you for your consideration.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

AT&T's \$39 billion dollar proposal to take over T-Mobile would be terrible for all cellphone consumers, and a perfect example of what our anti-trust laws are supposed to prevent. There isn't a single beneficial reason for allowing the creation of a second huge cell phone service except to serve the aims of the involved corporations. I protest the lack of choice, the higher prices, and the lack of incentive for innovation that will exist if this takeover is approved. I further protest AT&T's history of blocking and censoring content, and because of that wonder why this sale is even being considered. I will very soon be canceling my AT&T cell phone because of all of these concerns. I want my rights as a consumer, and I expect the FCC to protect those rights! The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Michael Russell

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Nola Butler-Byrd

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Nancy Haywood

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Hm. Didn't I hear something about monopolies being illegal? Is that another one of those laws that's fallen by the wayside? Or can I hope that my government will actually regulate in favor of regular citizens, the way it was set up to? The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. If I recall rightly, AT&T had to split up some years ago because it breached the anti-trust laws. So now it's OK for it to become a monopoly again? Why? The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Harvey Rabichow

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Mary Spurling

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Hey FCC: I am watching you closely on this one. Giving consent to the transfer of control of licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65) is OUT OF LINE. AT&T's proposed takeover of T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. The FCC's own strategic plan sets out its role as a DEFENDER OF COMPETITION: "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." HELLO??? Anyone thinking will have no doubt the proposed takeover will lead to higher prices and worse: Stifled choice and innovation in the marketplace. Even worse than that: Consolidation of media and telecom hurts our ability to access information freely and hold our government accountable. AT&T has a history censoring content and blocking phone features it doesn't like. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and BLOCK THIS TAKEOVER.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Elizabeth Piner

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Priyanka Basu

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Mergers of such huge players as AT&T and T-Mobile should NOT be allowed, as such a move would thwart competition and raise consumer prices. The FCC should \*not\* allow this merger, which blatantly violates the spirit—if not the letter—of U.S. anti-trust laws. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Rosemary Bittmann

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I urge the FCC not to consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T. I feel this consolidation would be in direct opposition to the stated purpose of anti-trust legislation and regulations. This potential takeover would give AT&T and Verizon 80% of the market. This would be bad for competition. Your role at the FCC is to defend the consumer and foster competition. This proposed takeover of T-Mobile would not foster competition. As I feel the price I now pay is way above what a reasonable fee should be for cell phone service, I fear it will go higher if this proposed takeover is approved. This proposed takeover will not serve the best interests of the consumer and it is your duty to decide upon the impact to consumers as well as upon the benefit accruing to big business that AT&T represents. Please say NO to this proposal. Thanks you for your consideration.

Sincerely,

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Robert Evans

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The centralization of power is anathema to democracy. Therefore, the FCC should not permit the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). Although I am an AT & T customer, it is because I have no choice in my area. Also, I have had to pay out hundreds of dollars out of pocket because a contract I signed was automatically renewed without my knowledge in my job. The cost of the buyout exceeded my monthly salary. AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC opposes media monopolies but that is just what this takeover amounts to. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Thomas Rottmayer

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Sally Applegate-Rodeman

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Steffan Schulz

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. How long are these mega-corporate mergers going to be allowed to go on? It hurts everyone except the ultra-rich. They are eventually going to price themselves out of the market. If prices keep going up (as they inevitably will, if this merger is allowed), at a time when so many people are struggling and cutting corners, they will just lose customers. The wealthy can't support everything, as more and more ordinary people can't afford a product or service. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Sharon MacLeod

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What is America becoming ? Controlled by a few enormously big companies and the CONSUMER, Me and My family and millions of others will no choice but to pay and pay and pay what ever they want to charge us!CONTROL THE MEDIA WE RELY UPON FOR NEWS AND INFORMATION, AND TAKE AWAY OUR CHOICES!! SHAME on the FCC!! You are supposed to protect the CONSUMER & American Small Business!!!!!! How often are we told that competition is GOOD!! Your own strategic plan , defendes competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services. SO WHAT ARE YOU THINKING TO ALLOW THIS TAKE-OVER????????? " AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. It would lead to higher prices, stifle choice and innovation in the marketplace. Even more serious, consolidation of media and telecom hurts the PUBLIC'S ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable!!! AT&T has a history censoring content and blocking phone features it doesn't like. Some people don't like government intervention in any place, BUT HERE is an important place to interveine! PLEASE STOP THIS NOW! BEFORE WE FIND THAT WE ARE ACTUALLY LIVING IN A COUNTRY LIKE CHINA WHERE THE MEDIA IS TOTALLY CONTROLLED!!!

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Susan Savion

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I urge you to protect consumers by denying the transfew of T-Mobile to AT&T (Docket No. 11-65). This type of merger is the kind that anti-trust laws are supposed to prevent. It would lead to overdomination of mobile phone service by 2 providers (AT&T and Verizon) The FCC's has pledged to defend competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." Allowing AT&T to take over T-Mobile would not fulfill this pledge. the proposed merger would result in lessened competition higher costs to consumers and less choice available. AT&T also has a concerning history of censoring content. I urge you to protect competition in mobile phone services and block this takeover.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Sally Anderson

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. The situation is already untenable in that they have you stuck with a 2 year contract which costs so much to break that you are held hostage. The choices are already too few; please stop the take over.

Sincerely,

Terri Guerra

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Thomas Markel

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). Remember when AT&T controlled all long distance and local phones? It was broken up into baby bells and local service separate from long distance. That was a huge win for the consumer. Letting 2 companies have 80% of the cell business is just as onerous. Stop it now. AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

George Eastham

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable.
